Delivering Superior Shopping Experiences to Lead the Industry in Customer Satisfaction

As a key member of the Cocokarafine Group, we operate over 1,400 drugstores and dispensing pharmacies nationwide, spanning from Hokkaido to Okinawa. Guided by our Group philosophy, "Creating the future 'normal' and innovating lifestyles," we are committed to pursuing the health and beauty of our customers and patients, striving to play a vital role in the community-based integrated care system. We actively support the health and well-being of our employees to help build a healthier society. At the same time, anchored in our core principle of "making our customers happy," we deliver personalized services tailored to the unique needs of every individual.

Business Plans and Policies

To serve as vital local hubs for self-medication and self-care, we operate a nationwide network of over 1,400 stores across four distinct formats: Urban, Shopping Street, Residential, and Suburban. Capitalizing on our advantage as a "close and convenient" store, we continuously expand our offering of daily essentials, centered on pharmaceuticals and cosmetics. In addition to providing products for health and beauty, we design stores that prioritize convenience and solve everyday customer needs. Furthermore, by leveraging our specialized expertise and counseling to deliver high-value-added services, we continue to expand our dispensing pharmacies while establishing health support and primary care pharmacies in close partnership with medical institutions. We are also dedicated to developing "primary care pharmacists" by ensuring safe and accurate dispensing, comprehensive medication counseling, home healthcare services, and active collaboration with specialized medical institutions. Through these initiatives, we deliver tailored support for local residents, building a trusted framework that encourages community members to seek health guidance with peace of mind.

Future Policies

Treating business uncertainty as a constant, we build a resilient management foundation capable of withstanding external volatility. Specifically, while deepening customer engagement by expanding our Group membership base, we will place record-performing health and beauty private brands at the core of our strategy to build brand loyalty and a dedicated fan base. Additionally, by streamlining operations through digital systems, we dedicate more time to face-to-face counseling and specialized care, delivering a high-value-added, personalized experience to every customer. By aligning these initiatives with the community-based integrated care system, we will build a change-resilient healthcare network, contributing to extended healthy longevity across local communities.
