Contributing to the logistics efficiency of the entire MatsukiyoCocokara & Co. Group through the in-house operation of our logistics centers

Our company was founded on October 1, 2019, to operate the Tokorozawa Distribution Center, handling logistics for Cocokarafine Healthcare stores in the western suburbs of Tokyo. Since then, we expanded our network by opening the Soka Logistics Center in March 2021 to handle store logistics for the eastern suburbs of Tokyo, followed by the Fukushima Ohiraki Center (Osaka) in November to cover the central Hanshin area. Operating each of our centers as a TC-type (transit) distribution center, we build a demand chain tailored to store operations and manage the entire process—from receiving goods from wholesalers to the final consolidation before shipment to stores—on a Just-In-Time (JIT) basis. Additionally, these centers serve as distribution hubs for 'MatsukiyoCocokara Q,' our online store delivery service designed to enhance customer convenience and contribute to a superior shopping experience.

Name	MCC Flux Avance Co., Ltd.
Location	Inotech Bldg., 3-17-6 Shinyokohama, Kohoku-ku, Yokohama, Kanagawa, 222-0033 Japan
Tel:	+81-45-548-5466
Established	October 2019

Business Plans and Policies

We will promote Group-wide supply chain management, focusing on the following four key areas.

Quality	We maintain consistently high quality, addressing issues swiftly to drive continuous improvement.
Cost	We mitigate the impact of economy-wide increases in logistics costs through continuous operational improvements.
Delivery	We strictly adhere to Service Level Agreements, ensuring on-time delivery and optimal product condition.
Sustainability	We ensure business continuity by developing logistics professionals and a resilient organizational structure.

Endorsing the government-backed "White Logistics" movement, we are fully committed to our Voluntary Action Declaration, driving initiatives that range from optimizing transit operations to ensuring driver safety.

Six initiatives of the Voluntary Action Declaration:

- 1. Collaborating on Logistics Improvements**
We actively listen to our business partners regarding ways to reduce loading and unloading times and streamline ancillary tasks, while proactively offering our own improvement suggestions.
- 2. Introducing a Truck Reservation System**
We utilize a truck reservation system to minimize driver wait times for freight handling.
- 3. Utilizing Freight Handling Equipment**
We reduce loading and unloading times by leveraging equipment such as pallets, trolleys, collapsible containers, and returnable crates.
- 4. Optimizing Inspection Standards**
We engage in constructive dialogue regarding reasonable requests concerning inspection methods and return conditions, while proactively suggesting our own optimizations.
- 5. Ensuring Safety During Loading and Unloading**
To prevent workplace accidents, we establish clear safety protocols, designate safe walkways, and ensure health and safety through regular training. We also clarify liability for damages in the event of an accident.
- 6. Suspending Operations During Extreme Weather**
We prioritize safety by suspending deliveries when extreme weather conditions—such as typhoons, heavy rain, or heavy snow—occur or are forecast. We fully respect safety-driven decisions to cancel or halt transport operations.

Future Policies

Guided by the motto, "Logistics is why customers choose us!", our mission is to ensure a stable supply to our stores. Every employee takes pride in our distribution center operations, ultimately contributing to society. Furthermore, our top management visits the facilities in person to engage in ongoing dialogue with everyone from center managers and full-time employees to service crew members. Through these conversations, we identify challenges related to operations, the working environment, and compensation, and implement effective measures to address them. Through these dialogues, we will foster a safe working environment for our employees while building an open organizational culture where everyone can participate in improvement initiatives and freely share their ideas.
