

Climate Change "B" and Water Security "B-" in CDP Questionnaire 2025

We are pleased to announce that MatsukiyoCocokara & Co. has received a "B" rating in Climate Change and a "B-" rating in Water Security of the CDP Corporate Questionnaire 2025. CDP is an international non-governmental organization (NGO) that promotes environmental information disclosure.

To realize our Group's philosophy and vision, we have identified "consideration of the health of the earth" as one of the key material issues based on our management assumptions. As a Group-wide effort, we aim to reduce CO₂ emissions by 40% in fiscal year 2030 (compared to fiscal year 2021) and achieve net-zero CO₂ emissions in fiscal year 2050.

The frequency and severity of disasters due to climate change threaten the safety and security of local communities and people. At the same time, they pose a serious threat to the Group's business continuity and development. As a social infrastructure company that operates drugstores and pharmacies, our efforts to address climate change are directly linked to maintaining a healthy global environment and sustainable business activities. With this recognition, in addition to climate change measures, we are also focusing on preserving water resources that are essential to maintaining the health of the global environment. Starting this fiscal year, we have strengthened our disclosure and management of water risks by including "water security" in our questionnaire response.

In accordance with MatsukiyoCocokara & Co.'s environmental policy, the Group will implement various initiatives to address these climate change risks and environmental issues.

■ About CDP

CDP is a global non-profit that runs the world's only independent environmental disclosure system. As the founder of environmental reporting, CDP believes in transparency and the power of data to drive change. Partnering with leaders in enterprise, capital, policy, and science, it surfaces the information needed to enable Earth-positive decisions. In 2024, more than 24,800 companies and 1,000 cities, states, and regions disclosed environmental information through CDP. Financial institutions with more than a quarter of the world's assets under management rely on CDP data for investment and loan decisions. The CDP questionnaire integrates key disclosure standards and best practices into a single framework, including alignment with IFRS S2, the ISSB's climate standard. CDP is a global team united by a shared desire to see a world where people, planet, and profit are truly balanced.
