

## MatsukiyoCocokara & Co.

### Selected by GPIF's domestic equity managers for “Excellent Sustainability Disclosure” and “Most-improved Sustainability Disclosure”

MatsukiyoCocokara & Co. (Headquarters: Bunkyo-ku, Tokyo; President and Representative Director: Kiyoo Matsumoto) is pleased to announce that it has been selected for the Materiality-focused “Excellent Sustainability Disclosure” and “Most-improved Sustainability Disclosure”, chosen by domestic equity investment managers, as announced by the Government Pension Investment Fund (GPIF) on March 17, 2026.

We have been highly regarded by the investment managers as follows.

- “Excellent Sustainability Disclosure”: 2 votes
- “Most-improved Sustainability Disclosure”: 1 vote

This selection is based on the 23 asset managers entrusted by GPIF. They identified up to 10 companies (and up to 5 for showing the greatest improvement) that they found helpful for making investment decisions and engaging in dialogue throughout the year. In light of developments such as the International Sustainability Standards Board (ISSB)’s standard-setting efforts, the various awards, such as “Excellent Integrated Reports,” have been consolidated into a single “Excellent Sustainability Disclosure” award from this fiscal year.

We view our sustainability disclosure materials, including the integrated report, as important tools for deepening our dialogue with our stakeholders. Going forward, we will continue our commitments to enhance our corporate value by more clearly demonstrating the alignment between materiality and our business strategy and by further enriching and strengthening our disclosure practices.
